## **THE HOSPITALS AND THE DEPARTMENT/SPECIALTY – FACILITIES, RESOURCES AND ACTIVITY & STAFFING STRUCTURE**

The Beatson West of Scotland Cancer Centre (BWoSCC) is Scotland's largest cancer centre, and the largest in the UK based on activity. The centre has undergone unprecedented capital and resource investment and our clinical teams are redesigning the way oncology services are delivered to a population of 2.9m people across four Health Board areas. It offers our team of professionals a truly state-of-the-art environment in which to practise and develop their skills.

An internationally-renowned teaching centre, the Cancer Centre incorporates the academic units of Medical Oncology, Radiation Oncology, Translational Research and Palliative Care. Glasgow is a large, lively and friendly city and a great place to make a home. The schools are excellent and many are local to the cancer centre. In addition it has excellent transport links to other parts of Scotland, the UK and beyond.

### **Role of the Cancer Centre**

The role of the Cancer Centre is to deliver all non-surgical oncology services for residents of the West of Scotland on the basis that:

- services meet equitably the assessed needs of the population served
- a high quality service, integrated within the Cancer Centre and also with other cancer care providers, is provided
- services provided compare favourably with those elsewhere in the UK and there is continual focus on improving care and treatment for patients
- expenditure represents value for money
- staff are valued and encouraged to maintain high standards of patient care through, for example, access to continuing professional development
- clinical outcomes are monitored and are discussed in the context of clinical audit and clinical governance
- research and development are encouraged

### **The Work of the Directorate/Department/Specialty**

The Beatson West of Scotland Cancer Centre provides specialist oncology services to 60% of the Scottish population. The centre sees over 10,000 new patients a year and over 70,000 return patients. Over 100,000 fractions of radiotherapy and 28,000 cycles of chemotherapy are given each year in the centre alone. The clinical teams also deliver medical cancer treatments in 13 local hospitals in partnership with local specialist cancer teams. The centre employs over 800 staff including 75 consultants in oncology and haematology. The annual budget of Specialist Oncology Services is over £100m.

The centre has 122 beds in 6 wards (1 Ward of 19 beds is for haemato-oncology). One of these wards runs as an 8 bedded Brachytherapy Unit. There is also a large and busy Day Case Chemotherapy Unit comprising 48 treatment stations. The centre has a self contained Acute Oncology Assessment Unit staffed by Advanced Nurse Practitioners which provides unscheduled care for cancer patients on treatment. The centre has its own out-patient department and a large aseptic facility for cytotoxic reconstitution. The unit has an accredited gene therapy aseptic facility. Up to 10 appropriate patients are accommodated in a local hotel while they undergo radiotherapy. The Beatson West of Scotland Cancer Centre (BWoSCC) is superbly equipped with 11 linear accelerators, all of which incorporate facilities for VMAT and on-board imaging (OBI). We continue to install state-of-the-art Varian TrueBeam™ units through the Capital Equipment Replacement Programme (CERP) utilising Scottish Government funded ring fenced monies. These facilities have allowed a dynamic, “can-do” approach to the development of new treatment techniques. The centre has launched high intensity mode (24 Gy/min) VMAT for stereotactic intracranial radiosurgery and for lung stereotactic ablative radiotherapy (SABR), both firsts for the UK. In addition, VMAT has become a well established routine treatment for all radical head and neck, brain, Gynaecological, Anal cancers and prostate tumours.

VMAT has become the treatment of choice at the centre for most radical radiotherapy treatments. We are the only centre in UK offering Pelvic SABR for Gynaecologic cancer. There are exciting programmes underway to continue to develop the technique for liver and spine. We are about to start a programme for SABR for Oligometastatic disease.

Supporting these developments is an expanding IGRT programme with facilities for CBCT, 4DCT, on-site MRI and PET/CT. 4DCT imaging is offered routinely for lung, and, driven by local clinical interest, will shortly be introduced for pancreas and breast. Imaging is supported by 3 CT Simulators. On treatment verification for several sites is in the form of either daily or weekly CBCT.

A satellite unit opened in November 2015 at the Lanarkshire Beatson site. This facility augments our radiotherapy capacity with 2 further TrueBeam LINACS with full planning and mould room capability. The Lanarkshire Beatson is located 20 miles to the east of the parent centre.

The centre has a generously equipped brachytherapy facility with dedicated theatre and 2 HDR treatment units. On-site MRI is used to facilitate imaged-guided

brachytherapy for cervix. There is an established LDR seed programme for prostate.

There is excellent access to CT, CT-PET and MRI scanning facilities for radiation planning, both in the Cancer Centre and in the adjacent West of Scotland Pet Centre. A second CT-PET scanner was installed in June 2011. There is a national PACS system for Scotland making access to imaging seamless. There is excellent co-operation with the Regional Department of Clinical Physics and Bio-Engineering whose headquarters are at the Western Infirmary. The Radiotherapy Division is based in the Cancer Centre. A large program of research and development in radiation physics has been developed, including research fellows and research physicists. The Radiotherapy Research Group and its program are led by Professor Anthony Chalmers.

National services at the Cancer Centre include sarcoma, prostate brachytherapy and ophthalmic oncology. The Cancer Centre offers the full range of evidence-based regional oncology services including CHART radiotherapy for lung cancer.

The Beatson West of Scotland Cancer Centre (BWoSCC) and NHS Greater Glasgow & Clyde are partners with the Institute of Cancer Sciences, University of Glasgow, and the CR-UK Beatson Institute, Glasgow, as part of the CR-UK Glasgow Centre. The Institute of Cancer Sciences within the College of Medical, Veterinary, and Life Sciences, University of Glasgow has clinical Professors of Clinical Oncology, Translational Cancer Research, Clinical Cancer Research, and Translational Haematology currently in post, all of whom have clinical sessions at the Beatson West of Scotland Cancer Centre. Professor Owen Sansom directs the laboratories at the internationally renowned CR-UK Beatson Institute located 3 miles from the Beatson West of Scotland Cancer Centre. This collaboration within the CR-UK Centre offers an unrivalled opportunity and environment for collaboration in basic and translational cancer research including in cancer genomics, radiotherapy research, precision medicine, and early and late phase clinical trials.

The BWoSCC houses one of the CR-UK cancer Clinical Trials Units (CTU) and the Glasgow Experimental Cancer Medicine Centre (ECMC). The research facilities at the Beatson West of Scotland Cancer Centre, including the CTU and the ECMC with its dedicated Clinical Research Unit, can facilitate the coordination of early phase and late phase trials in most tumour types in solid tumour oncology and in haemato-oncology, including large, multi-centre trials (EORTC, MRC, CR-UK), translational trials (with an investigational medicinal product) and has a strong portfolio of industry-sponsored studies. The Stratified Medicine Scotland Innovation Centre, the MRC Molecular Pathology Node, and the Imaging Centre of Excellence at the Queen Elizabeth University Hospital, Glasgow, provide further outstanding facilities to support translational and clinical research

Clinics are held in eight hospitals within NHS Greater Glasgow & Clyde and in seven in other board areas. Chemotherapy is prescribed and delivered in nine hospitals out with the city of Glasgow.

In 2013 the centre opened a new Acute Oncology Assessment Unit to provide on site specialist triage and assessment of cancer patients with unscheduled needs. This unit is staffed by 2 Advanced Nurse Practitioners and 4 senior triage nurses 8-8pm Monday to Friday. In May 2015 we opened a 4 bed High Acuity Unit staffed by Critical Care nurses who also facilitate an outreach service throughout the centre for medically deteriorating patients.

## **Staff**

The Names of current consultant members of the Service are:

### **Clinical Oncology**

Dr Allan James (Radiotherapy Lead)	
Dr David Dodds	Dr Carrie Featherstone
Dr Diana Ritchie	Dr Helena Belikova
Professor Anthony Chalmers	Dr Stefano Schipani
Dr Fiona Cowie	Prof Nick Reed
Dr Ioanna Nixon (Clinical Director)	Dr Claire Paterson
Dr Rosemary Stevens	Dr Nazia Mohammed
Dr Allan James	Dr Jan Wallace
Dr Kathryn Graham	Dr Azmat Sadozye
Dr Abdulla Alhasso	Dr Jonathan Hicks
Dr David McIntosh	Dr Christina Wilson
Dr Vivienne MacLaren	Dr Sam Marashi
Dr Rosie Harrand	Dr Graeme Lumsden
Dr Ben Fulton	Dr Grainne Dunn
Dr Norma Sidek	Dr Carolyn Lamb
Dr Brian Clark	Dr Derek Grose
Dr Noelle O'Rourke	Dr Nick MacLeod
Dr Ross Carruthers	Dr Stefan Nowicki
Dr Tareq Abdullah	Dr Ashleigh Kerr
Dr Stephen McKay	Dr Amy Martin
Dr Alanna Morton	Dr Sean O'Cathail
Dr Iffet Rabnawaz	Dr. Cicely Cunningham
Dr. Brendan McCann	

### **Medical Oncology**

Dr Hilary Glen	Dr Sharon Armstrong
Dr Ros Glasspool	Dr Jennifer Brown
Prof Rob Jones	Prof T R Jeff Evans
Prof Iain MacPherson	Dr Jeff White
Dr Sophie Barrett (SACT Lead)	Dr Judy Fraser
Dr Lucy Scott	Dr Ashita Waterston
Dr Nicola Steele	Dr Clinton Ali
Dr Janet Graham	Dr Dawn Storey
Dr Balaji Venugopal	Dr Sarah Slater
Dr Anne McKillop	Dr Patricia Roxburgh
Dr Chiara Braconi	Dr Fieke Froeling
Dr Maria Martinez	Dr Manreet Randhawa
Dr Lisa Rodgers	Dr Barbara Stanley
Dr Yun Yi Tan	Prof. Richard Wilson

Dr Ishtiaq Zubairi  
Dr Saurabh Vohra

Dr Leena Mukherjee

### **Palliative Medicine**

Dr Alison Mitchell  
Dr Jane Edgecombe  
Dr Eilidh Burns

### **Number and Grades of Junior Medical Staff**

“Specialist Registrars”	19 in Clinical Oncology + 5 in Medical Oncology
FY2/CMT/GPST	16
Associate Specialist in Oncology	1
Speciality Doctors	6

### **Departmental Organisation**

In order to facilitate medical management the BWOSCC is divided into 6 teams for specialist oncology services based on the following tumour sites:

- Breast
- Lung
- Urology
- GI
- Head & Neck (& neuro-oncology)
- Gynaecology (including neuro endocrine and sarcoma)

All wards within the BWOSCC (with the exception of brachytherapy) are allocated to the teams and have integrated medical and clinical oncology stakeholders. There are 2 Consultant on-call rotas, one for Medical Oncology and one for Clinical Oncology. On call commitments take priority over scheduled commitments when consultant is on call. The BWOSCC is committed to multi-disciplinary team working and the Cancer Managed Clinical Networks for the West of Scotland.

Each team has a trainer who supervises the trainees. Clinical and Educational Supervision is provided to trainees in conjunction with the local Deanery. The teams are headed by a team leader who is responsible for the development of departmental medical protocols, absence management and team deployments.

All consultants participate in care delivered by multidisciplinary cancer site specific teams consisting of Specialty Doctors, Clinical Nurse Specialists, IV Nurses, Pharmacists and Phlebotomists. All beds are shared and managed by a Bed Management Team who arranges admissions on the basis of need. The centre has a 6 bedded state of the art, age appropriate Teenage and Adolescent Unit which is used by patients between the ages of 16 and 25 with solid and haematological cancers.

## **JOB DESCRIPTION, JOB PLAN & PERSON SPECIFICATION**

The GP in Oncology will be responsible to the Clinical Director of the Beatson West of Scotland Centre. The duties will involve the care of patients of the consultants. The post works within a tumour site team based structure. This should allow GP in Oncology to be more involved with a specific tumour type team, and rotation can occur at intervals, to be mutually agreed. A degree of flexibility is expected within the job plan as clinicians work within a team of doctors who are deployed as appropriate across the service.

The GP in Oncology will be based in the Beatson West of Scotland Cancer Centre and will assist in the various outlying clinics. The potholder is orientated to a specific team in relation to Multidisciplinary Team Meetings, Chemotherapy Pre-Assessment Clinics, and in prescribing duties.

Teams of Consultants and Registrars go to multi-professional MDTs and clinics. GPs in Oncology are expected to be able to participate in such team based clinics if needed.

### Clinical Commitments

The postholder will be part of the local team involved in the management of chemotherapy. In the out-patient setting this could involve prescription of protocol based therapy under the direction of the clinical team involved.

The postholder will refer any queries to the appropriate Clinician in charge of the patients.

### Proposed Job Plan

A part time sessional job plan will be agreed in conjunction with the Clinical Director. This is anticipated to include sessional Outpatient clinic cover and associated admin time.

### Continuing Education

The centre runs regular teaching activities each week and training will be given as required. Each GP in Oncology undergoes yearly appraisal and is expected to have a yearly Personal Development Plan agreed with their line manager, (Clinical Director).

## MAKING YOUR APPLICATION

### Please note

- Take note of the **Closing date** and the **Job reference number** of the vacancy. Please quote the reference number on any correspondence.
- Applications for Medical and Dental posts within NHS Greater Glasgow and Clyde (NHSGGC) will only be accepted via the completion of an **online application form** via our eRecruitment system (JobTrain)

If this is the first time you are applying via JobTrain, you will be asked to create an account. You can do this via an email address or social media

account. NHS Scotland does not accept CV's in addition to/instead of a completed application form.

If you already have an existing account, you will have the option to copy a previous application. Please ensure that you go through the application to ensure that the details are up-to-date and complete.

- Please make sure that the **email address** submitted is correct as this will be our primary method of contact during each stage of the recruitment process.
- You will **time-out** after 30 minutes of inactivity. Please regularly save your application.
- You need to provide **at least two (2) referees, one of which must be your current employer/line manager**. It is Board policy that no person can act as a member of an Advisory Appointments Committee and be a referee for a candidate for that post. You should therefore check with your proposed referees whether there is likely to be any difficulty in this respect for we may otherwise have to invite you to submit another name or names
- At the Shortlisting stage, all application forms are **anonymised** and only the Education, Employment and Assessment/Supporting Statement Information sections are accessible to those involved in the recruitment process
- **Interviews** are conducted either in-person or via MS Teams video call. If the interview date is not noted on the advert, you will be contacted with the details as soon as they are available to allow you to book. You will receive an email with the link to join if your interview will be a video call.

#### **Job Interview Guarantee Scheme**

NHSGGC recognises the contribution all individuals can make to the organisation regardless of their abilities. As part of our ongoing commitment to extending employment opportunities, all applicants who are disabled and who meet all the minimum criteria expressed in the job description will be guaranteed an interview. All information will be treated as confidential. We only asks for relevant information with regards to your disability to ensure that we can assist you if you are called for interview.

- **If you delete your application, you will not be able to re-apply.**
- **Professional Regulatory Bodies Membership (GMC/GDC)** details must be provided on the application form
- Before submitting your application please make sure you read **the Declaration section**. This section will highlight any parts of the form which haven't been completed and it also covers the following important information:
  - Criminal Convictions Declaration - NHS Scotland is exempt from the

1974 Rehabilitation of Offenders Act (Exclusions & Exceptions) (Scotland) Order 2003.

- Accuracy of Information - False or misleading information can cause disqualification of the application and dismissal from employment if appointed to the post.
  - General Data Protection Regulation (GDPR) and Data Protection Act 2018 - Your data will be stored by Jobtrain and will be used only by NHSGGC authorised staff for the purpose of processing your job application, making recruitment decisions and for statistical and audit purposes. It will be retained, archived, and deleted in line with the NHS Scotland retention policy and will not be passed to any third party organisations without your permission
- **Please remember to review your application prior to submission as once you submit, you will not be able to edit any details or make changes.**

## **LIVING AND WORKING IN THE GREATER GLASGOW AND CLYDE**

We understand that choosing the right place to live is just as important as choosing the right job. Many people who have relocated to Scotland have been attracted by the opportunity to enhance their quality of life.

Scotland's people are well known for being warm, welcome and friendly. Scotland is a home to over five million people, and it is estimated that for every person living in Scotland, another five people living across the world have Scottish ancestry. With

such wide connections spreading to every corner of the globe, it is no wonder that overseas visitors are made to feel like they are returning home!

As a place to live, the Greater Glasgow and Clyde area has many attractions. The West of Scotland combines cosmopolitan charm, lush countryside and soothing seaside. Culturally diverse, architecturally stunning and historically rich, this vibrant region is home to innovation, celebration and the largest city in Scotland – Glasgow.

As Scotland's most populous region, the West of Scotland is home to approximately two million people. In addition to the city of Glasgow, East and West Dunbartonshire, Inverclyde, Ayrshire, North and South Lanarkshire, Renfrewshire and East Renfrewshire make up this captivating and eclectic part of the country.

This is a region of striking contrast. Larger areas like Glasgow are within easy reach of picturesque towns, villages and some of Scotland's most scenic beaches, captivating wildlife and tranquil countryside.

## **Glasgow**

Multicultural, magnificent and brimming with personality, Scotland's largest city is home to nearly 600,000 people. Discover rich history, stunning architecture and the best shopping in the UK outside London. Glasgow is one of the highest ranking cities in the UK for quality of life. (source: Mercer survey, 2012).

This aptly-named 'Dear Green Place' blends the best of urban-living with the splendour of lush gardens and parks. Impressively, the city boasts more green space per square mile than any other UK city. With some of the biggest and brightest businesses Scotland has to offer, in addition to enjoying the scenery, you can explore the many great career opportunities the city offers.

Offering the best of both worlds, Glasgow is close to breath taking countryside offering up nearby hill walking, sailing, and cycling. Some of the world's greatest golf courses are all within an hour's drive of the city. And this bustling city's arts and culture, nightlife and food are hard to surpass.

Home to over 133,000 students from around the world, this vibrant city has five world-renowned universities and seven colleges.

## **Lots to see and do**

No matter what your age or interest, the West has something for you. Be dazzled by Charles Rennie Mackintosh's iconic architecture in Glasgow or satisfy your appetite with mouth-watering produce at the farmers' markets in Renfrewshire and Inverclyde.

You also have your choice of impressive year-round events and festivals, attractions or some of the best leisure facilities in the country. And as a UNESCO City of Music, Glasgow offers an impressive range of musical delights.

## **Housing**

Whether you are renting or buying, Glasgow offers a superb selection of housing. Here you'll have your choice of apartments on the River Clyde, spacious Victorian flats in the West End and family homes in leafy suburbs conveniently located near to schools.

## **Getting around**

The region's excellent transport links mean you're connected to the rest of the UK - and the world. The M8 motorway connects the West with the rest of Scotland, taking just under an hour to drive between the country's major cities Glasgow and Edinburgh, a well-used commuter's route. The bus is an effortless way to get around because it's inexpensive and widely available across the region – even in remote locations.

Glasgow has the UK's largest suburban rail network outside London. An abundance of stations and travel times makes exploring the region by train an easy option. The rail network links both rural areas and cities with the rest of Scotland and the wider UK. From Ardrossan, Gourock and Wemyss Bay you can also travel by ferry to many of Scotland's islands, or further afield from one of the cruise ships that dock at Greenock harbour.

Glasgow's two international airports connect the region with the rest of the UK and beyond. There are approximately 200 flights per day (pre pandemic levels) from Glasgow international airport alone, ready to fly to over 90 destinations like London, Dubai and New York. The best of the city-living, magnificent countryside and an opportunity to work in some of Scotland's most exciting industries means this region is a hugely popular place to live and work.
